

AMENDMENT TO THE CLAIMS

Please add new claims 14-20 as follows. This listing of claims will replace all previous versions of the claims.

1. (Canceled)
2. (Previously Presented) The display system of claim 13 wherein at least one of said first and second computer displays are user-supported displays selected from the group consisting of head-mounted displays, flat panel displays, neck hung displays, wrist-mounted displays and mixtures thereof.
3. (Original) The display system of claim 2 wherein one of said first and second displays is a non-user-supported display and one is a user-supported display.
4. (Original) The display system of claim 2 wherein said computer is a user-supported computer.
5. (Original) The display system of claim 2 wherein said computer is a mobile computer.
6. (Original) The display system of claim 2 wherein said computer is a vehicle-mounted computer.

7. (Original) The display system of claim 2 wherein communication means are in electrical contact with said computer.

8. – 12. (Canceled)

13. (Previously Presented) A display system for displaying information from a user-supported computer, the display comprising: at least one primary display and at least one display to supplement data received through said primary display (supplemental display), said supplemental display being a head-mounted display, said head-mounted display being worn on a user's head and which provides said user with limited contextual information; said primary display being a body-worn display, said body-worn display being supported by the body of said user and which provides said user with a fully functional computer display, and wherein said supplemental display has means to provide data to augment data displayed on said primary display.

14. (New) A display system for displaying information, comprising:
at least one primary display, the primary display being supported by the body of the user and providing the user with a fully functional computer display; and
at least one second display to supplement data received through the primary display, the second display being a head-mounted display.

15. (New) The display system of claim 14, further comprising means for displaying at least a portion of data displayed on the primary display on the second display.

16. (New) The display system of claim 14, further comprising means for displaying different aspects of data displayed on the primary display on the second display.

17. (New) The display system of claim 14, further comprising means for displaying different data on the primary display and the second display.

18. (New) The display system of claim 14, wherein at least a portion of data displayed on the primary display is displayed on the second display.

19. (New) The display system of claim 14, wherein different aspects of data displayed on the primary display is displayed on the second display.

20. (New) The display system of claim 14, wherein different data is displayed on the primary display and the second display.
